

# IPGSM-DP: Fire Alarm Communications Using IP and/or Cellular

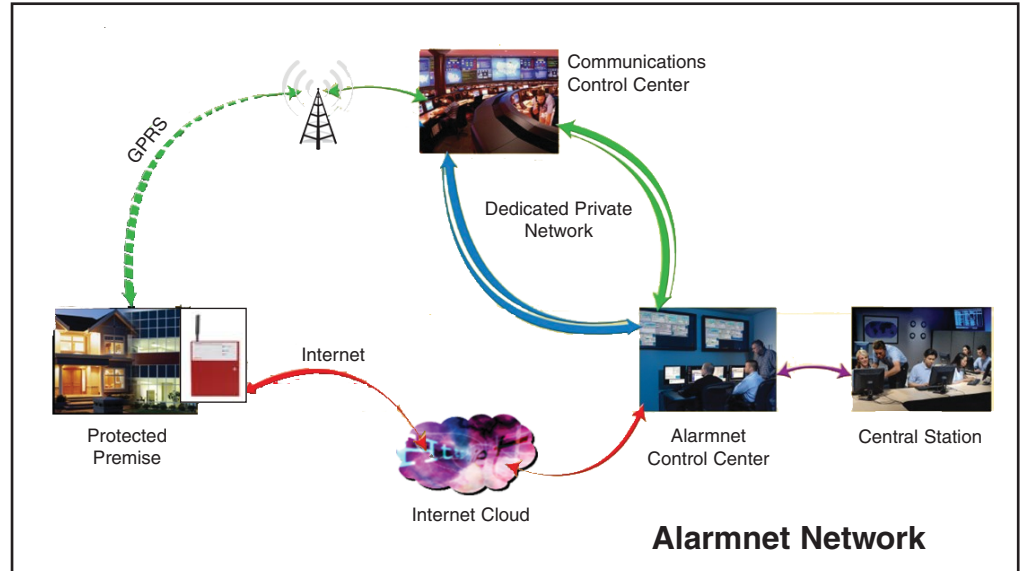

**Honeywell's IPGSM-DP Fire Alarm Communicator represents a leading edge communications solution for monitoring Fire Alarm systems.**

Employing a combination of Internet and/or GSM cellular signals, the difficulties of traditional POTS phone lines are now a thing of the past. It's fast, secure and effective alarm communications that connects to any Contact-ID fire panel and installs easily using Alarmnet. This is what Fire Marshals have asked for— multi-path fire alarm communications for a better level of reliability. And, it saves recurring job-site costs when dedicated phone lines are replaced, making the IPGSM-DP a product that truly pays for itself!

**Honeywell**

# IPGSM-DP

FEATURES	BENEFITS
Operates through Alarmnet (SIM included) using 256 Bit AES encryption protocol UL864 9th Edition Listed as a primary fire alarm communicator	Fast, secure and effective Fire Alarm Communications worthy of Life Safety Systems
Communicates using cost-effective IP connectivity, yet switches to GSM cellular communications if the internet goes down or selectable to GSM cellular only or IP only.	Multi-path redundancy preferred by Fire Marshal's to confidently replace dedicated phone lines (POTS)
Can be programmed at the office, and then installed with a single button at the job site	Sets up quickly by a wide range of installers without special training
Achieves full product benefits with each installation	No large system investment like what's needed in private radio networks
Connects to any CONTACT-ID Fire Alarm Panel and answers any phone number dialed by fire panel	Useable on just about every monitored fire system No need for panel program changes when retrofitting to existing CONTACT-ID Fire Panels
Eliminates the need for troublesome POTs lines	When replacing existing POTs lines it's a product that truly pays for itself!
